Appendix 1

Online Payments Security Guidelines

(incorporating EBA Guidelines of December 2014 on the Security of Internet Payments)

Savvi Credit Union Limited

Online Account Service Terms of Use

February 2016

This Appendix 1 contains detailed Guidelines to our Members relating to the security of online payments when using our Online Account Service.

These Guidelines have been drawn up by us to reflect the operation of our Online Account Service, and to accord with the guidelines on the security of online payments as issued in December 2014 by the European Banking Authority (see www.eba.europa.eu) as applicable to our Credit Union as a payment service provider.

1. Hardware & Software Requirements

- 1.1 Members must use a browser such as Internet Explorer, Google Chrome, Firefox, Opera or Safari to access our Credit Union website and Online Account Service. It is your responsibility to ensure your browser is adequately protected with the appropriate security application.
- 1.2 When your browser and our server are establishing a secure session, they will exchange a secret code commonly referred to as a session key. The session key is used to encrypt all the data as it passes through the Internet, including your account details, Transactions and loan applications (if applicable). The information is decrypted only when it reaches your browser.
- 1.3 A digital certificate allows you to verify that your browser is communicating with our server and not another server. You are responsible for verifying that your browser indicates a digital certificate is in place when using the Online Account Service.
- 1.4 The Online Account Service requires cookies to function. A cookie is a piece of information that our server gives to your browser once you have logged in to the Online Account Service and a secure session is active. Without the information and data contained in the cookie, you would have to login every time you are asked to submit information from our server when using the Online Account Service. For more information on the use and operation of cookies, please see our Privacy Policy/Statement on our website.
- 1.5 The Online Account Service utilises several layers of technology to ensure the confidentiality and integrity of the Transactions. We use TSL Protocol (Transport Layer Security) to ensure that data cannot be read by other computers as it travels between your browser and our server during a secure session. Part of TSL Protocol involves use of a Message Authentication Code (MAC). Accordingly if a message is tampered with in transit, then your browser will not accept this message.
- 1.6 When you logout of the Online Account Service, the data and information stored on the cookie is deleted from our system. By logging out, you terminate your session on the Online Account Service securely. You are responsible for ensuring that you click the Logout button to successfully terminate your session and exit the Online Account Service.

2. Submitting and Authorising a Payment Order

- 2.1 By submitting a Payment Order, you are permitting us to act on such Payment Order as given by you, or which appears to have been given by you and submitted via the Online Account Service. All Payment Orders given are irrevocable unless otherwise agreed by us.

2.2 You must provide the following information when submitting a Payment Order:

- Name of the Payee;
- BIC and IBAN and/or Sort Code and Account Number;
and
- Transaction amount/value.

2.3 You are responsible for the accuracy of the information provided when submitting a Payment Order via the Online Account Service.

2.4 The Online Account Service allows you to create and manage your Payee(s) from within the Online Account Service. To add a new Payee and subsequently action and authorise a Payment Order to such Payee, you are required to log in to the Online Account Service and click on the "Add Payee"/"External Payee" (as applicable) icon. You will then be directed to a page wherein you are required to submit details referable to the Payee as follows: 1) Name of Payee; 2) BIC & IBAN and/or Sort Code & Account Number (as applicable). A verification code may then be sent to your mobile phone using the mobile phone number you have provided on your initial registration for the Online Account Service. On receipt of the verification code, you are then required to input the verification code sent to your mobile phone on the Online Account Service to authorise and complete the addition of the new Payee and continue to the submission of a Payment Order. Alternatively, the Credit Union may contact you via the telephone to verify the information provided by you or verify such information with you in person in our Office.

2.5 When making a payment to a utility company, you are required to log in to the Online Account Service and choose the relevant utility company from a drop down menu. You will then be directed to a page wherein you are required to submit your account number referable to that utility company. The verification process as outlined in Clause 2.4 applies in this regard.

3. Applying for an Online PIN

3.1 When registering for access to the Online Account Service, you will be required to apply for an Online PIN.

3.2 When applying for an Online PIN in our Office(s), you will be required to provide the following verification documents:

- photographic identification in the form of a passport and/or driver's licence;
- proof of address (dated within the previous three months);
- your mobile number; and
- your email address.

This information will be inserted into our system and used to update your Account accordingly. When your identity has been verified, an Online PIN will be generated randomly by the Online Account Service to ensure the security of your access to the Online Account Service. Your Online PIN will then be issued to you. As an additional security measure, we may, prior to issue of any Online PIN, request you to provide us with a hard-copy Online PIN request letter.

- 3.3 When applying for an Online PIN via our website, you will be required to complete all required fields on the online application form and insert the code as shown. On clicking "Submit Form", the online application form will be emailed to us. On receipt of your online application form, we will then verify your identity and the information emailed by you to us by contacting you on the telephone number provided by you for initial and (as applicable) ongoing registration purposes. On completion of the verification process, an Online PIN will then be issued and sent to you by post to the address provided by you for initial and (as applicable) ongoing registration purposes. As an additional security measure, we may, prior to issue of any Online PIN request you to provide us with a hard-copy Online PIN request letter. In the event we cannot verify your signature, we will contact you via phone or email and request you to visit our Office(s) to retrieve your Online PIN. You will be required to bring photographic identification with you to enable us to verify your identity prior to us issuing your Online PIN to you.
- 3.4 In the event we cannot verify your signature, we will contact you via phone or email and request you to visit our Office(s) to retrieve your Online PIN. - 3.5 In the event that the verification documents as applicable to your Account are out of date, we reserve the right to deny your request for an Online PIN. We will notify you of same by email. You will be required to provide up to date photographic identification and proof of address within the previous three months before we can proceed to issue an Online PIN to you. .

- immediately make an application for a new Online PIN in accordance with Clause 3 of this Appendix 1 on our website or in our Office(s); and
